ANMOL PUNJ

FULL STACK DEVELOPER

+91 6239036360 | anmolpunj24@gmail.com | https://www.linkedin.com/in/anmol-punj | https://github.com/anmolpunj-24

SUMMARY

Full Stack Developer with 3+ years of experience in frontend development and 6+ months of hands-on backend development, specializing in building scalable, responsive, accessible, and high-performance web applications. Strong experience with JavaScript, React.js, Next.js, HTML5, CSS3, SCSS, Tailwind CSS, Node.js, Express.js, MongoDB, MySQL, and REST APIs.

Experienced in component-based architecture, API integration, responsive design, cross-browser compatibility, performance optimization, MVC architecture, authentication, database-driven applications, debugging, and clean code practices. Familiar with LLD, HLD, monolithic and microservices architecture, CI/CD pipelines, Git-based workflows, SSR, CSR, and scalable application design.

Passionate about turning complex requirements into clean, maintainable, reusable, and production-ready solutions while balancing user experience, performance, scalability, and business requirements.

TECHNICAL SKILLS

Frontend Development

JavaScript (ES6+) | TypeScript | React.js | React Hooks | Next.js | HTML5 | CSS3 | SCSS/SASS | Vanilla CSS | Tailwind CSS | Bootstrap

UI/UX & Web Standards

Responsive Design | Cross-Browser Compatibility | WCAG Accessibility | Semantic HTML | Component-Based Architecture | Reusable Components | Figma | UI/UX Implementation

Backend Development

Node.js | Express.js | REST APIs | Middleware | JWT | MVC Architecture | Server-Side Development | Authentication & Authorization | API Development | Error Handling

Databases

MongoDB | Mongoose | MySQL | SQL | Schema Design | Database Design | CRUD Operations | Data Modeling

API Integration

REST APIs | Axios | Fetch API | API Contracts | HTTP Methods | JSON | Request/Response Handling | Razorpay integration

Rendering & Web Architecture

Server-Side Rendering (SSR) | Client-Side Rendering (CSR) | Monolithic Architecture | Microservices Architecture | Low-Level Design (LLD) | High-Level Design (HLD) | Scalable Architecture

Performance Optimization

Lazy Loading | Dynamic Imports | Code Splitting | Image Optimization | Image Compression | Web Performance | Rendering Optimization

Build, Development & DevOps

Git | GitHub | NPM | Webpack | Vite | Environment Variables | CI/CD Pipelines

Software Engineering

Clean Code | Debugging | Technical Documentation | Modular Architecture | Code Reusability | Error Handling | Problem Solving

Data Structures & Algorithms

Arrays | Loops | Objects | HashMap | HashSet | Searching | Sorting | Problem Solving

---

PROFESSIONAL EXPERIENCE

CODE ACADEMICS

Jalandhar, Punjab

Full Stack Developer | March 2026 – Present

- **Developing full-stack web applications using Next.js, React.js, Node.js, Express.js, MongoDB, and Mongoose, with a focus on scalable architecture and maintainable code.**
- **Built and maintained RESTful APIs following MVC architecture with controller, service, and repository layers for structured backend development.**
- **Developed authentication and authorization workflows, customer management, product and category management, SEO, FAQ, order, payment, and other e-commerce modules.**
- **Designed and implemented MongoDB schemas and relationships for users, customers, addresses, products, product variants, images, SEO, reviews, orders, order items, and payments.**
- **Integrated frontend applications with REST APIs using Axios, handling authentication, dynamic data, forms, validation, API states, and error handling. Implemented responsive and reusable interfaces using Next.js, Tailwind CSS, React Hook Form, and Lucide icons, with emphasis on usability and consistent UI architecture.**
- **Integrated Razorpay payment workflows for e-commerce checkout, including payment link creation, payment**

verification, and payment status management. Applied backend validation, data integrity checks, soft deletion, role-based access control, and structured error handling across application modules.

Key Projects:

SWAAD — Taste of Punjab

Full-stack e-commerce platform built with Next.js, Node.js, Express.js, and MongoDB, featuring customer authentication, category and product management, product variants, images, SEO, reviews, orders, and Razorpay payment integration.

Frontend Projects

Developed multiple responsive frontend applications using React.js and Next.js, focusing on reusable components, API integration, responsive layouts, form handling, and modern UI development.

DIGITAL HEALTH NEWS

Noida, Uttar Pradesh

Frontend / Full Stack Developer | October 2024 – February 2026

- **Developed scalable Next.js applications, CMS dashboards, reusable UI components, forms, charts, and API-driven modules using JavaScript, SCSS, and modern frontend practices.**
- **Built and maintained component-based architecture, improving code reusability, maintainability, consistency, and development efficiency across multiple products.**
- **Integrated REST APIs using Axios and Fetch, handling dynamic data, API contracts, request/response flows, authentication, error handling, and frontend-backend communication.**
- **Improved application performance through lazy loading, dynamic imports, code splitting, image optimization, and image compression, reducing unnecessary resource loading and improving user experience.**
- **Developed responsive interfaces with a strong focus on WCAG accessibility, semantic HTML, cross-browser compatibility, SSR/CSR, and mobile-first responsive design.**
- **Contributed to backend development using Node.js, Express.js, MongoDB, Mongoose, and MySQL, implementing REST endpoints, CRUD operations, middleware, JWT-based authentication, schema design, and MVC-based application structure.**
- **Collaborated with designers and backend developers to translate requirements and Figma designs into production-ready, scalable, and maintainable applications.**

Key Projects:

DHN CMS

Scalable content management and data monitoring dashboard for creating, managing, and updating digital content through API-driven interfaces.

DHN Web Platform

Responsive Next.js business platform featuring healthcare news, CIO podcasts, industry insights, reusable UI modules, and performance-optimized pages.

ScaleHealthTech CMS

Internal CMS platform for managing website content, services, media, and business data under the parent organization.

ScaleHealthTech Website

Next.js website showcasing services and solutions through responsive, modular, and performance-focused interfaces.

DELENTE TECHNOLOGIES

Gurugram, Haryana

Frontend Developer | November 2022 – September 2024

- **Developed responsive and pixel-perfect web interfaces from Figma designs using React.js, Next.js, HTML5, CSS3, SCSS, Bootstrap, and JavaScript.**
- **Built reusable React components and modular UI architecture, improving maintainability, consistency, and development efficiency. Integrated REST APIs using Axios and Fetch, handling dynamic data, API responses, filters, forms, and frontend-backend communication. Improved application performance using lazy loading, image optimization, code splitting, and rendering optimization.**
- **Ensured responsive design, cross-browser compatibility, accessibility, and consistent user experience across desktop, tablet, and mobile devices.**
- **Debugged and resolved frontend issues across development and production environments while following clean code, reusable architecture, and maintainability practices.**

Key Projects:

CarBike360.com

High-traffic automobile comparison platform built with Next.js and SCSS featuring advanced filters, vehicle specifications, dynamic data, and reusable optimized UI components.

CarBike360.ae

UAE-focused automobile listing platform developed with React.js, providing localized vehicle data, responsive interfaces, filtering functionality, and optimized user experiences.

EDUCATION

Bachelor of Technology **Lyallpur Khalsa College Technical Campus, Jalandhar, Punjab**

Graduated: June 2023 | CGPA: 8.26
